

Who is Tétris?

A leading design x build company

Our passion is rooted in designing and building vibrant places that inspire people to think better, work better and live better.

This ambition is manifested in every aspect of the design process before being hand crafted with care and precision, a precision also inherent in our scheduling and project management.

We can imagine and deliver environments that are as beautiful and functional as they are sustainable. Environments that reflect your ambitions and needs no matter what your unique requirements are.

24,000+
projects delivered in the last five years

30
corporate offices

More than **900**
employees

Offices in **13**
countries

Our mission

At Tétris, we firmly believe that office fixtures and fittings play a crucial role in employee wellbeing and performance, and turn a workspace into a living space with personality and soul. Thanks to our dedicated Furniture Solutions department, we have the expertise to make your office environment a priority so that it becomes a real driver of your brand image and a true reflection of your company culture.

With the benefit of an extensive choice of partner brands, varied positioning and styles, we seek to meet all your needs by bringing you the most suitable solution that corresponds perfectly to your budget and lead times.

Our aim is to help you get the most out of every one of your workspaces. We know that office fixtures and fittings must combine comfort and functionality, ergonomics and efficiency, plus help to make it a pleasure to be in the workplace. The set-up must be adapted to the individual, but also to the group, and provide modular, flexible and varied solutions to encourage discussion, the sharing of information and social contact.

With a multi-disciplined team consisting of project managers, interior designers, graphic designers and logistics experts, we are here to listen and offer you the state of the art office set-up that meets your needs.

Betty Surgis
Head of Furniture Solutions

We apply 3 fundamental principles

Design oriented

We work creatively to design, develop and deliver a made-to-measure office set-up.

- | Offering the best possible quality of life for your workforce.
- | Ensuring that your office set-up reflects your company image.
- | Showcasing your brand and company culture.

Focus on excellence

We work to the highest standards, and will fit out your space to your exacting requirements.

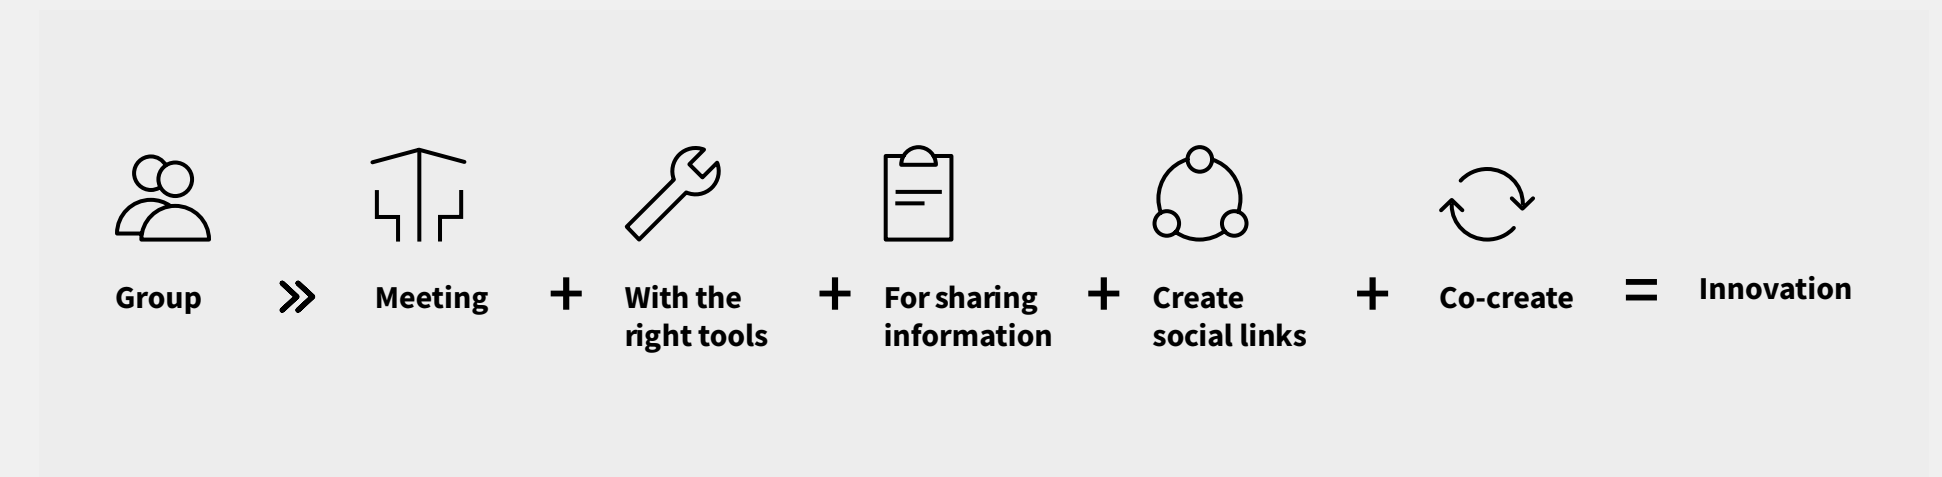

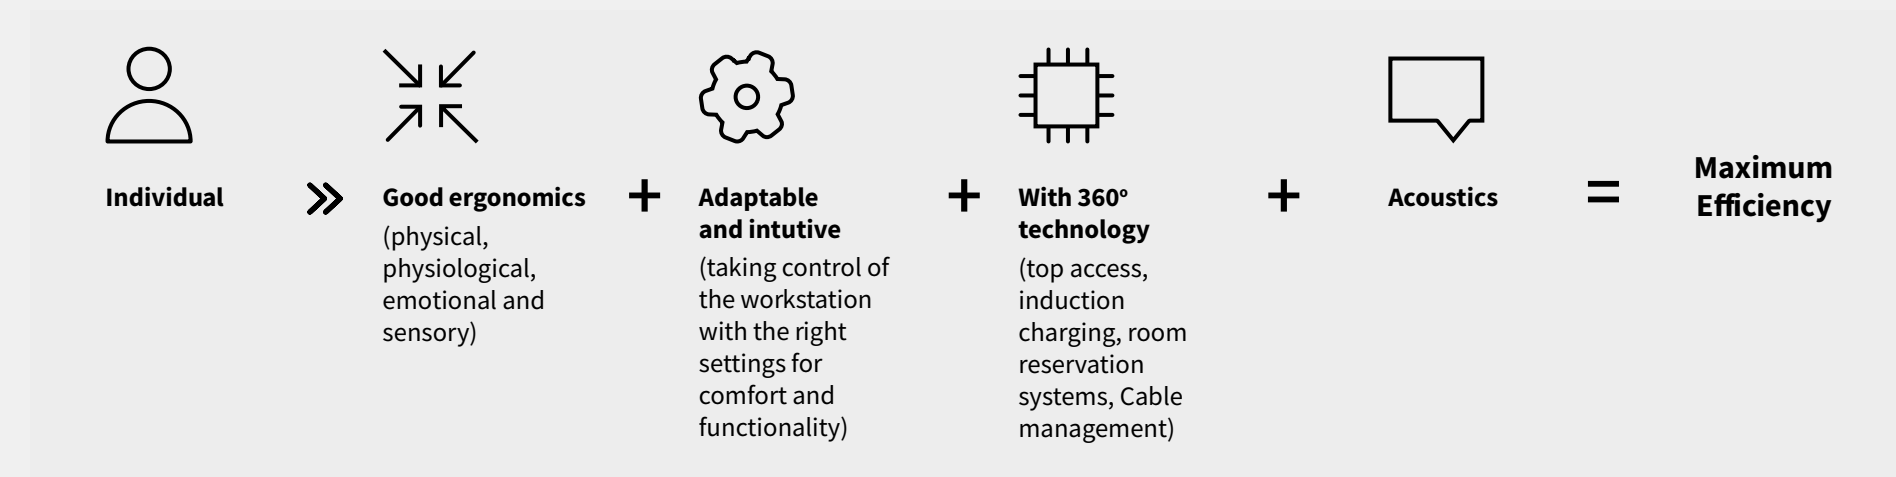

Efficient delivery

We work within your budget and stick to your lead times.

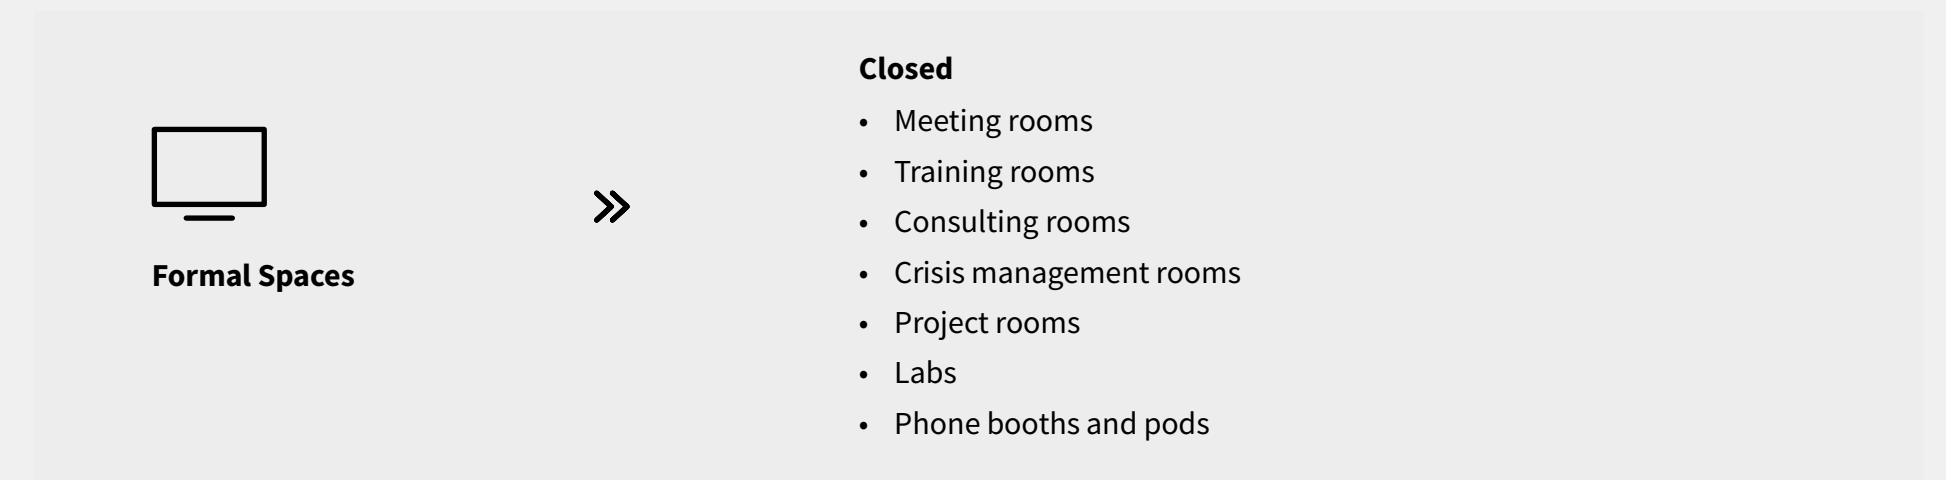

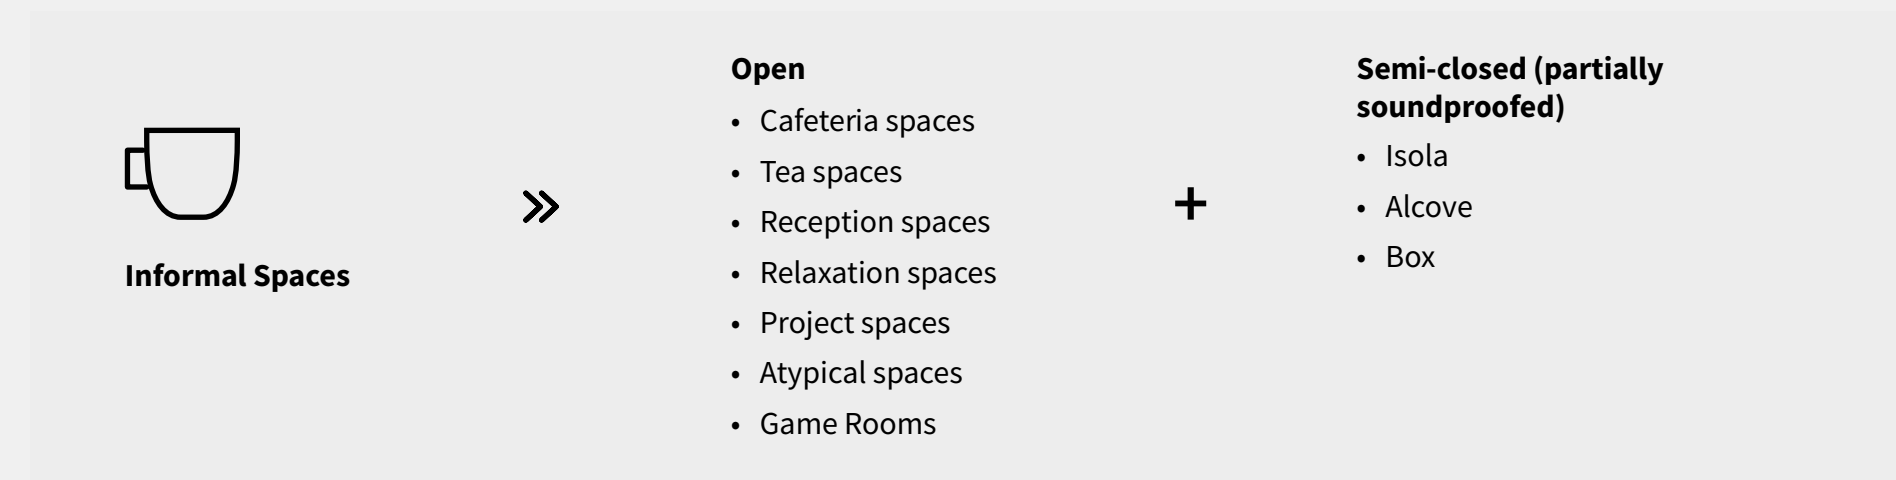

The perfect setting

Improve employee performance by providing office set-up solutions adapted to individuals and groups.

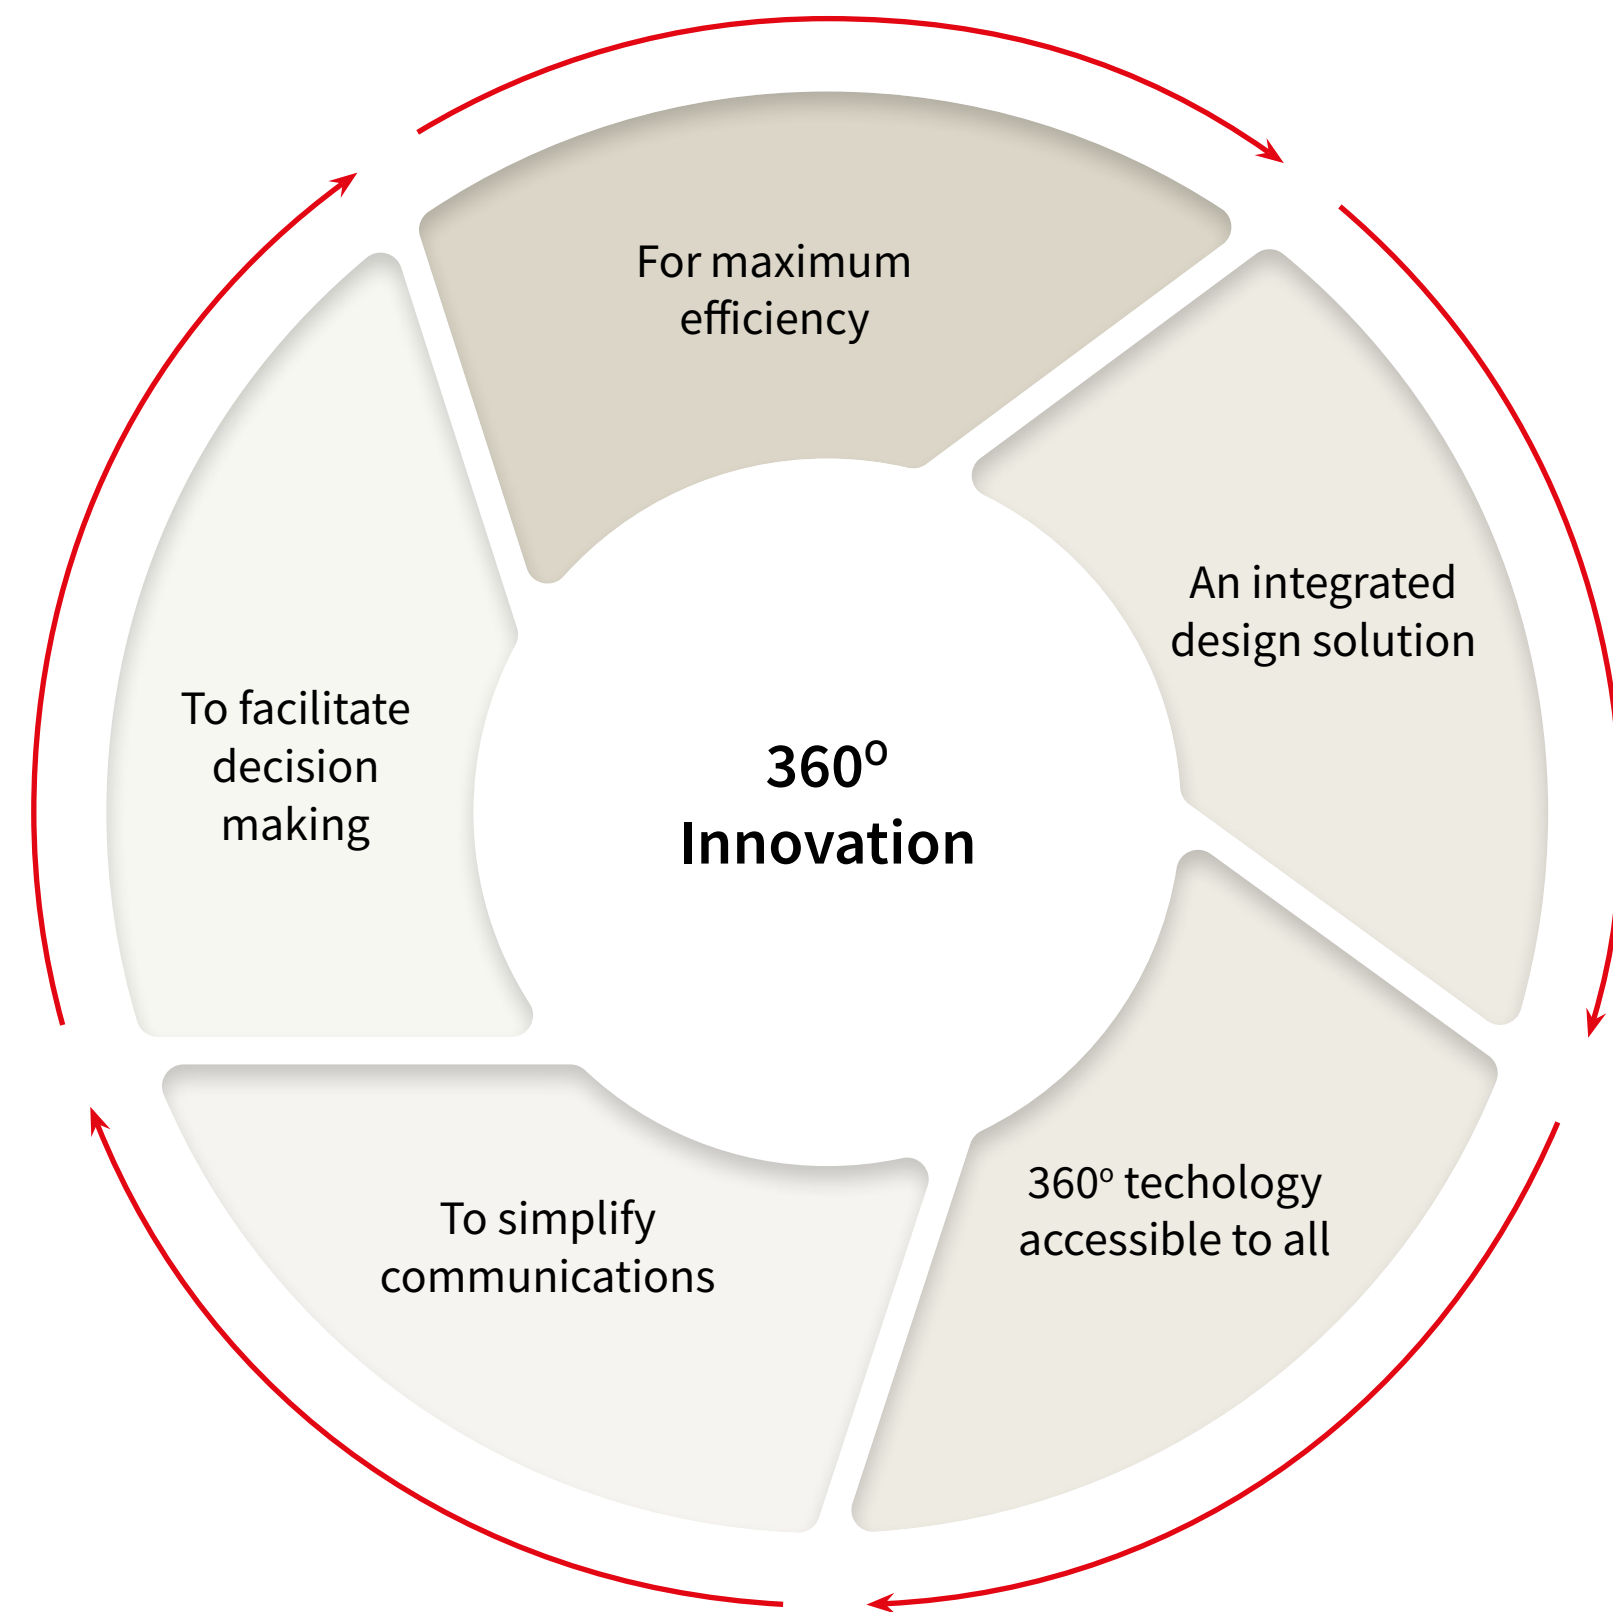

Combining collaborative spaces

Depending on your needs, we can create flexible solutions that break away from more conventional spaces and methods of meeting and encourage collaboration

Integrating innovation and technology

We can provide an office set-up solution by placing innovation and technology at the heart of your business.

How we support your sustainability goals

We will address your needs while taking sustainability into account at every stage of your project. This approach involves designing highly efficient work spaces, as well as indoor air quality (IAQ) to meet the requirements of environmental certifications including WELLTM, BREEAMR, LEEDR, HQETM and SKA rating.

In order to do so, we will encourage you to choose products that are safe for end users thanks to low emissions of VOCs and formaldehydes, but also for the environment, thanks to their recycled parts. These products come with sustainability labels and certificates such as EPD - Environmental Product Declaration- or DoP - Declaration of Performance. They are internationally recognised and are taken into account in certifications for fit-outs.

We're taking an increasingly focused look at the circular economy and extending the useful life and value of furniture by helping our customers to reuse, donate or recycle their old furniture. Here are some other ways we're making a difference:

■ **Transportation and carbon footprint**

As much as possible, we work with manufacturers who have factories that are close to your projects so the materials don't have to travel too far.

■ **Sustainable partners**

We value working with, and purposefully select manufacturers who are making proactive efforts to reduce their energy, material and water consumption for the production of furniture. Initiatives could include reusing wood scraps for heating, using solar panels to produce energy, reducing packaging, reusing paint particles within the production cycle or water reprocessing.

■ **Turning waste into design**

We encourage our clients to take an innovative approach to reuse, and aim to work with partners who incorporate a high rate of recycled materials into new furniture.

■ **Quality, modularity and resistance over time**

We're interested in ecosystems that preserve the value of materials and pieces of furniture for as long as possible with a strong commitment to quality.

■ **Cleaning for a second life**

We can apply a full cleaning service to office chair frames and seats or office desks to give them a new lease of life.

■ **Repair and replace**

We can repair, renovate and embellish your professional furniture by replacing parts or providing a technical review of your current office chairs and armchairs. For example, we can replace the top of an office bench while keeping the basic structure and legs, or change the seat part of a chair, or its worn armrests.

Partners to suit your needs

All our partner brands are actively involved in the development of products that meet or exceed European environmental standards.

We work with a variety of partners so will be able to support your furniture needs, space by space.

Our global footprint means we're perfectly-placed to help international businesses who want a local touch.
